RUTUJA KULGOD

UX/Product Designer, System & Scale

Singapore PR | rutujakulgod@gmail.com | linkedin.com/in/rutuk |

PROFESSIONAL SUMMARY

I design systems the way architects design buildings — structural, intuitive, scalable. With a 10-year foundation in architecture and landscape design, I bring that same discipline to digital products, translating complex, cross-functional problems into experiences that are research-led, systems-driven, and built to scale.

CORE SKILLS

UX Strategy • User Research • Stakeholder Interviews • Usability Testing • Information Architecture • Journey Mapping • Wireframing • Prototyping • Design Systems • Enterprise SaaS • Workflow Design • Dashboard Design • AI-Assisted Design Workflows (Research Synthesis, Rapid Wireframing, Component Generation) • Cross-Functional Collaboration • Stakeholder Management • Agile Product Delivery • Design-to-Development Handoff • Design Governance • Data-Driven Design

TOOLS & TECHNOLOGIES

UX & Product Design: Figma, Fig jam, Adobe Creative Suite, Canva, Miro

AI Tools: Claude Code & Design, Figma Make, Perplexity, Codex, Google Stitch - used for research synthesis, rapid wireframing, and component generation

Research & Testing: User & Stakeholder Interviews, Optimal Workshop, A/B Testing, Google Analytics, Microsoft Power BI

Project Management: Jira, Notion, Miro, Microsoft Office, GitHub, VS Code

Spatial & Emerging Tools: AutoCAD, Revit, SketchUp, Blender, Claude Design, Google Stitch

WORK EXPERIENCE

UX/Product Designer (Consultant) — Apr 2025 – Present

Utterwise Technologies Pvt. Ltd | Remote

- Serve as the main designer on a 3-person design team, working alongside 2 junior designers, on enterprise SaaS, B2B recruitment-tec for a fast-moving startup.
- Involved end-to-end on every project from requirement gathering and understanding system architecture with engineering, through to final screen design and handoff.
- Use AI tools (Figma AI, Claude Design) throughout the design process, synthesizing research findings, generating first-pass wireframes, and producing component variations to speed up iteration without sacrificing design quality.
- Designed a multi-tenant, role-based recruitment platform serving 5 distinct personas (Platform Admin, Tenant Admin, Business Admin, Hiring Manager, Sourcing Recruiter), grounded in interviews with hiring managers and sourcing recruiters at a live recruitment firm.
- Architected 3 end-to-end key workflows tenant management, hiring project creation, and candidate management including automated duplicate-candidate detection designed to reduce duplication errors by up to 80%.
- Mapped a service blueprint of the candidate management workflow, connecting recruiter-facing actions to backstage matching and permissions logic.
- Defined UX requirements and human-in-the-loop interaction patterns for two AI-powered features an AI job description generator and an AI-assisted profile parsing/duplicate-detection flow including review, edit, and approval controls for AI-generated output
- Kicked off usability testing with a first round of moderated walkthroughs, focused on validating the tenant management and candidate workflows before scaling further.
- Grew into this expanded scope after the earlier contract engagement, guiding the 2 junior designers on process and design-system consistency as the team scaled.

User Experience & Graphic Designer **Nov 2024 – Feb 2025**

Meinhardt Suite Pte Ltd | Singapore

- Worked on research and prototyping for a sustainability (ESG) dashboard for ESD engineers, speaking with stakeholders across different facility tiers to better understand how they tracked and managed data from Excel, PDFs, and SCADA systems. The research helped shape a role-based dashboard for management, operations, and public users, with a focus on making information easier to understand and act on.
- Gained exposure to the RFI, RFP, and bid-proposal review process through research and discussions with project managers, and developed an understanding of how AI-assisted workflows could help reduce manual effort and address common challenges in the AEC industry.
- Developed corporate brand guidelines and executive presentation frameworks supporting high-stakes global bid submissions.

UX Designer (Contract) **Jun 2024 – Nov 2024**

Utterwise Technologies Pvt. Ltd | Remote

- Worked as a junior UX designer on a Loan Origination System (LOS) platform, partnering with the team to understand core lending domain concepts and end-to-end workflows.
- Read and interpreted SRS (Software Requirement Specification) documents to translate business and technical requirements into structured user flows.
- Mapped end-to-end user flows for key LOS processes, supporting the wider team's design and product decisions.
- Assisted in designing select modules within the LOS platform under senior designer guidance.

Digital Designer Intern (Internship) **Nov 2023 – May 2024**

SPH Media Pte Ltd | Singapore

- Owned end-to-end creation of a tokenized Figma design system for The Straits Times' digital newsroom, introducing the team to components, light/dark theming, and reusable templates.
- Ran interviews with designers and developers to identify inconsistency and handoff gaps, then built and rolled out a 3-tier token → component → template system; the design team reported meaningful gains in template efficiency, handoff speed, and handoff accuracy after adoption.
- Engineered interactive digital stories bridging editorial content and reader engagement for the newsroom's digital storytelling initiatives.

Senior Architect (Landscape Design) **Nov 2018 – May 2023**

DP Architects & Henning Larsen | Singapore

- Led end-to-end landscape design for office, healthcare, residential, and public infrastructure projects, from site analysis and concept development through detailed planning and construction documentation.
- Collaborated directly with government agencies and statutory boards including NParks, LTA, HDB, PA, and PUB to translate environmental, regulatory, and user requirements into sustainable, high-quality design solutions.
- Managed multiple concurrent projects within budget and timeline constraints, coordinating across multidisciplinary teams of engineers, architects, and planners.

Architect (Landscape Design) **Feb 2014 – Jan 2017**

AO Landscape Architects | India

- Delivered landscape design projects from concept through construction documentation, collaborating with multidisciplinary project teams and clients.

EDUCATION & CERTIFICATIONS

UX Design Immersive — General Assembly, Singapore Jun 2023 – Sep 2023

Master of Architecture (Landscape Design) — CEPT University, India Jun 2011 – May 2013

Bachelor of Architecture — Savitribai Phule Pune University, India Jun 2005 – May 2010
